This publication is designed to provide reference data on imports to Canada. The reader should be aware that a broad interpretation has been given to the factor of "potential market opportunity".

Generally, data has been included where any possibility is considered to exist for one or a combination of the following: expanded marketing of existing Canadian products, further processing, alternate products, substitution of raw materials, new end use applications, technological developments, development of complementary products and components. Also, the possibility of achieving one of the above results could be affected by future market changes.

In cases of uncertainty, we have tended to include import data on some products and commodities, if only for information purposes.

In no case has an attempt been made to indicate or assess the feasibility of entering or competing within a particular market.

For more information on a particular product area or for additional copies of this publication, please contact the nearest DRIE Regional Office. These offices are listed on the inside back cover.

La présente publication vise à fournir des données de référence sur les produits importés au Canada. Le lecteur doit prendre en compte l'interprétation très large donnée à la notion de « possibilité éventuelle du marché » dans cet ouvrage.

En général, les données sur les importations sont fournies là où l'on considère qu'une des possibilités existe pour l'un ou plusieurs des éléments suivants : la commercialisation accrue des produits canadiens, une transformation plus poussée, les produits de remplacement, la substitution de produits ou de matières premières, les nouvelles applications, les progrès technologiques, la mise au point de produits complémentaires et de pièces détachées ou l'évolution du marché.

Dans le doute, nous avons tout de même fait paraître les données qui se rapportent à certains produits ou marchandises, ne serait-ce qu'à titre d'information.

Nous n'avons nullement tenté d'évaluer les possibilités de pénétrer un marché quelconque ou même de s'y mesurer.

Pour de plus amples renseignements sur une catégorie de produits en particulier ou pour obtenir des exemplaires supplémentaires de la présente publication, veuillez vous adresser au bureau régional du MEIR le plus près. La liste des bureaux régionaux se trouve sur le plat inférieur.

PREFACE

The main purpose of this catalogue is to provide businesses, associations, industrial developers and various levels of government with selected data on imports into Canada. It is aimed at increasing the business awareness of the enormous potential existing in the Canadian marketplace for domestic production and at stimulating Canadian business to explore further potential market opportunities in Canada. The catalogue forms part of the federal government's domestic marketing campaign.

The publication covers approximately 86 per cent of all products imported into Canada. For 1983 alone this percentage represented a significant \$64.1 billion. In order to condense the large volume of basic data from Statistics Canada, some crude product commodities have been omitted.

The following information is contained in the catalogue for ready reference:

- description of the product at the most detailed level given by Statistics Canada commodity codes
- import quantities, where available, and dollar values for 1980-1983
- average annual growth rate trends over the period 1980-1983
- major foreign country of export for each product in 1983 and that country's share of the import market

The import data are presented in four major sections to include a wide range of products: food products, fabricated materials, end products and selected commodities not further identified. A summary is included with each section.

The four sections are preceded by a general key-word index of major product listings to allow the reader to locate product information by reference to the commodity code numbers. A more detailed alphabetical index is also provided on page 577.

The user is encouraged to refer to the information contained in the "Explanatory Notes" to avoid drawing erroneous conclusions from the data.

It is important to emphasize that this catalogue does not attempt any assessment as to the feasibility of competing in a particular market. Although some products may be non-replaceable from a source material or production viewpoint, in many cases these have not been eliminated from the publication. Such situations could represent potential for substitution or in the development of complementary products in Canada.

Further information on import markets such as ports of entry, additional countries of export, and any available analysis of imports can be obtained through the principal regional offices of the Department of Regional Industrial Expansion (DRIE), listed on the inside back cover, or Statistics Canada as a primary data source. The DRIE regional offices can give additional consulta-

PRÉFACE

Le présent catalogue a pour objet de fournir aux entreprises, aux associations, aux promoteurs industriels et aux représentants de divers paliers de gouvernement des données choisies sur les importations au Canada. Il vise également à sensibiliser les gens d'affaires sur les débouchés considérables que présente le marché canadien pour la production nationale et à encourager les entreprises canadiennes à explorer davantage les possibilités de marché qui existent au Canada. La parution du présent catalogue constitue une partie du programme de commercialisation national du gouvernement fédéral.

La publication recense approximativement 86 % de tous les produits importés au Canada. Pour l'année 1983, ce pourcentage a représenté la somme de 64,1 milliards de dollars. Statistique Canada fournit un nombre considérable de données de base et, par souci de concision, les données concernant certaines matières brutes ont été omises.

Pour faciliter la consultation du catalogue, les données sur l'importation sont présentées de la façon suivante :

- la description du produit, dans la forme détaillée conforme aux codes de marchandises fournis par Statistique Canada;
- les quantités importées, lorsqu'elles sont connues, et leur valeur, exprimée en dollars, pour la période allant de 1980 à 1983;
- l'évolution du taux de croissance annuel moyen entre 1980 et 1983;
- le principal pays exportateur à l'étranger, pour chaque produit, au cours de l'année 1983, et la part du marché des importations détenue par ce pays.

Les données relatives aux importations sont présentées en quatre grandes parties regroupant une vaste gamme de produits : les aliments, les matières travaillées, les produits finis et des produits choisis non désignés ailleurs. Chaque partie comporte un résumé.

Les quatre parties sont précédées d'un index alphabétique des groupes de produits et marchandises, pour permettre au lecteur de retrouver les renseignements sur un produit donné, en consultant les numéros de code des marchandises. Le lecteur trouvera à la page 577, un index alphabétique plus détaillé.

Nous encourageons l'utilisateur à lire les notes explicatives, afin de ne pas tirer de conclusions erronées des données.

Il convient de souligner que le catalogue ne vise nullement à évaluer la possibilité de soutenir la concurrence sur un marché donné. Même si certains produits peuvent être irremplaçables pour des raisons soit de matières premières, soit de production, plusieurs d'entre eux sont néanmoins mentionnés dans le présent ouvrage. De telles situations, en effet, peuvent éventuellement représenter des possibilités de substitution des

importations ou encore de mise au point de produits complémentaires au Canada.

Pour obtenir de plus amples renseignements sur les marchés d'importation, par exemple sur les points d'entrée, sur d'autres pays exportateurs, ainsi que sur les résultats d'analyses d'importation effectuées, on peut s'adresser aux principaux bureaux régionaux du ministère de l'Expansion industrielle régionale (MEIR), qui figurent sur le plat inférieur, ou encore à Statistique Canada, principale source des données. Les bureaux régionaux du MEIR peuvent offrir d'autres services de consultation ou d'orientation en ce qui concerne les demandes de renseignements plus complexes et les questions portant sur des marchés donnés et sur le développement industriel.

Nous remercions tout particulièrement la Division du commerce extérieur de Statistique Canada pour son aide à la préparation des données à inclure dans le catalogue. Le lecteur est invité à faire part de ses observations et suggestions sur le catalogue et de les adresser au :

Afin de favoriser l'exploitation et l'expansion du marché national, une série de publications faisant le profil des produits d'après les tendances des marchés d'importation sera établie, afin de faire connaître les produits offrant d'importantes perspectives en matière de mise au point ou de production au Canada.

EXPLANATORY NOTES

Commodity Classification

Commodity statistics in this publication are shown in terms of the 1978 edition of the *Canadian International Trade Classification* (CITC) Reference Manual (Statistics Canada's Catalogue # 65-502E).

The CITC is an expanded version of the five-digit "Import Commodity Classification" (MCC) used in publication of trade statistics by Statistics Canada. In some instances the first five digits of the seven-digit CITC commodity code does not correspond to the five-digit MCC code.

The classification is organized at three levels. At the three-digit level, commodities are shown in major groups. The five-digit level includes headings generally describing a family of like commodities. Finally at the seven-digit level, specific products are identified. An example is illustrated as follows:

Three-Digit Commodity Group Code

832 - Sporting and recreation equipment

Five-Digit Commodity Code

83215 - Billiard equipment and parts

Seven-Digit Commodity Code

83215-20 Balls, billiard, pool and snooker
83215-30 Cues, billiard, pool and snooker
83215-33 Cue rests, billiard, pool and snooker
83215-39 Racks

Selection of Products

To obtain a balance between the size and the content of the catalogue, certain judgements were made in selecting products for inclusion. Section 1 consists of items from the area of food and related products which are believed to represent potential opportunities for expansion of domestic markets. Sections 2 and 3 include five-digit codes for all imports of fabricated products and end products. The three sections also include all relevant seven-digit data with 1983 imports of \$3 million and over.

Valuation

Imports are generally recorded at the values established for customs duty purposes according to the provisions of the Customs Act (Canadian dollars). Customs values are identical to selling prices for most arms-length transactions. However, customs values exceed selling prices for many transactions between affiliated firms.

Data Source

Statistics Canada is the source for all data included in this publication.

NOTES EXPLICATIVES

La classification des marchandises

Les statistiques sur les marchandises contenues dans la présente publication sont inscrites d'après l'édition de 1978 du manuel de référence intitulé *Nomenclature canadienne pour le commerce international des marchandises (NCCI)* (numéro 65-502F au catalogue de Statistique Canada).

La NCCI présente une ventilation plus poussée de la classification à cinq chiffres des marchandises d'importation (CMI) utilisée dans des publications statistiques sur le commerce par Statistique Canada. Dans certains cas, les cinq chiffres du code de marchandises NCCI à sept chiffres ne correspondent pas au code CMI à cinq chiffres.

Il y a trois classifications : la classification à trois chiffres selon laquelle les marchandises sont réparties en groupes; la classification à cinq chiffres qui s'applique aux familles de produits de même nature, et enfin la classification à sept chiffres qui se rapporte aux produits proprement dits. Cette classification à trois paliers est illustrée par l'exemple qui suit.

Code groupe de marchandises à trois chiffres

832 — Articles de sport et de divertissement

Code de marchandises à cinq chiffres

83215 — Accessoires de billard et pièces

Code de marchandises à sept chiffres

83215-20 Billes de billard, de pool et de snooker
83215-30 Queues de billard, de pool et de snooker
83215-33 Appuis pour queues de billard, de pool et de snooker
83215-39 Rateliers

La sélection des produits

Pour déterminer la dimension et le contenu appropriés du catalogue, plusieurs avis ont été émis quant aux produits à y inclure. La première partie recense les aliments et produits connexes qui, croit-on, présentent d'éventuelles perspectives d'expansion des marchés nationaux. Les deuxième et troisième parties contiennent les codes à cinq chiffres pour toutes les importations de matières travaillées et de produits finis. Dans les trois parties figurent toutes les données à sept chiffres pertinentes pour les produits dont les importations se sont élevées à 3 millions de dollars et plus en 1983.

L'évaluation

Les importations sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la *Loi sur les douanes* (en dollars canadiens). Les valeurs des douanes sont identiques aux prix de vente pour la plupart des transactions effectuées sans lien de dépendance. Toutefois, les valeurs des douanes dépassent les prix de vente pour de nombreuses transactions effectuées entre entreprises affiliées.

Additional Notes in Reference to Data Tables

Many commodity codes do not have quantities recorded with them because of the dissimilar types of products or parts included in these codes.

N.A. — "Growth Rate Not Available"

If no imports are reported for the base year (1980) the average annual growth rate for the 1980-1983 period cannot be calculated.

In some cases however, the base year may show no imports, yet still indicate an average annual growth rate. This is due to the rounding of all figures, i.e. import codes with a value of less than \$500 are recorded as \$0, import codes with values \$501 to under \$1 000 are recorded as \$1 (thousand of dollars).

NOTES EXPLICATIVES

La source des données

Toutes les données présentées dans cette publication proviennent de Statistique Canada.

Le taux de croissance annuel moyen

Le taux de croissance est calculé sur une moyenne des gains accumulés depuis 1980.

Notes supplémentaires à l'égard des tableaux de données

Les volumes n'accompagnent pas tous les codes de marchandises en raison des différents types de produits ou de pièces compris dans ces codes.

N. D. : « taux de croissance non disponible »

Si aucune importation n'est signalée pour l'année de référence (1980), le taux annuel moyen de croissance pour la période entre 1980 et 1983 ne peut être calculé.

Dans certains cas, toutefois, aucune importation n'est indiquée pour l'année de référence bien qu'il y ait un taux de croissance annuel moyen. Cela est attribuable à l'arrondissement de toutes les données, c'est-à-dire que les codes d'importation dont la valeur est inférieure à 500 \$ sont considérés comme 0 \$ et les codes d'importation dont la valeur est de 501 \$ à 1 000 \$ comme 1 \$ (millier de dollars).

GENERAL KEY-WORD INDEX

This is an index of the major products found in the catalogue. It contains an alphabetical listing of the products with their commodity group code(s) indicating the first three digits of the five-digit numeric code which is displayed by ascending order in the import data tables. The first three digits in the data tables are underlined. A more detailed index can be found on page 577 .

SECTION 1

Food, Feed, Beverages and Tobacco

Summary

This section covers commodity group codes 013-183. Only products which are believed to represent potential opportunities for expansion of domestic markets have been included.

The imports listed in this section represent \$1.7 billion (35 per cent) of the value of all imports during 1983 for products coded to this commodity section.

PREMIÈRE PARTIE

Les aliments, provendes, boissons et tabacs

Résumé

La présente partie renferme les codes groupes de marchandises de 013 à 183. Seuls les produits qui, croit-on, présentent d'éventuelles perspectives d'expansion des marchés nationaux ont été indiqués.

Les importations énumérées dans la première partie se sont élevées à 1,7 milliard de dollars, soit 35 % de la valeur des importations globales en 1983 pour les produits dont le code apparaît dans cette partie.

SECTION 4

Selected Commodities - Not Further Identified

Summary

This section contains a listing of Canadian International Trade Classifications (CITC) which exceeded \$3 million in 1983 but were excluded from sections 1 to 3 since they could not be identified in any greater detail than the Import Commodity Classification (MCC) description. The total value in this section amounted to \$15.2 billion.

The general key-word index on page ix and the detailed alphabetical index on page 577 can be utilized for this section by applying the commodity group code to the first three digits of the seven-digit numeric code. However in some instances there may be a seven-digit code shown that does not correspond to the commodity group code. In these rare cases further searching may be required.

QUATRIÈME PARTIE

Les produits choisis, non désignés ailleurs

Résumé

La présente partie comporte une liste des produits de la *Nomenclature canadienne pour le commerce international* (NCCI) dont les importations ont dépassé 3 millions de dollars en 1983, mais qui n'ont pas été indiqués dans les première, deuxième et troisième parties puisqu'ils ne pouvaient être décrits de façon plus détaillée que par la Classification pour les marchandises d'importation (CMI). La valeur globale des produits indiqués dans cette partie s'est élevée à 15,2 milliards de dollars.

L'index des groupes de produits et marchandises à la page ix et l'index alphabétique détaillé à la page 577 peuvent être utilisés pour cette partie, en appliquant le code groupe de marchandises aux trois premiers chiffres du code numérique à sept chiffres. Toutefois, dans certains cas, le code à sept chiffres ne correspond pas au code groupe de marchandises. Dans ces cas, d'autres recherches s'imposent.

DETAILED ALPHABETICAL INDEX

This is a detailed index of products found in the catalogue. It contains an alphabetical listing of products with their commodity group code(s) indicating the first three digits of the five-digit numeric code. Because only the three-digit commodity group code is shown it will be necessary to undertake further searching at the five- and seven-digit level to zero in on specific products.

INDEX ALPHABÉTIQUE DÉTAILLÉ

Il s'agit d'un index détaillé des produits que l'on retrouve dans le catalogue. Il contient une liste alphabétique des produits ainsi que leur(s) code(s) groupe(s) de marchandises avec les trois premiers chiffres du code numérique de cinq chiffres. Puisque seul le code de trois chiffres est indiqué, il faudra entreprendre une recherche plus poussée au niveau des codes de cinq et sept chiffres afin d'obtenir plus de détails sur des produits donnés.

FAITES-VOUS PARTIE DU SYSTÈME DE REPÉRAGE DES DÉBOUCHÉS ?

Le système de repérage des débouchés (S.R.D.) est un système informatisé où l'on retrouve des renseignements sur plus de 14 000 sociétés et sur les produits qu'elles fabriquent au Canada. Le S.R.D. intègre des renseignements obtenus de sociétés manufacturières canadiennes et de niveau international dans un système qui identifie rapidement et de façon efficace des fournisseurs canadiens pour les marchés intérieurs et internationaux.

L'inscription des entreprises au S.R.D. est gratuite et volontaire.

- ☐ J'aimerais obtenir de plus amples renseignements sur le S.R.D.
- ☐ J'aimerais obtenir une formule de demande pour le S.R.D.

ARE YOU A MEMBER OF BOSS?

The Business Opportunities Sourcing System (BOSS) is a computerized system containing information on over 14 000 companies and the products they make in Canada. BOSS takes individual information from Canada's manufacturing and international trading companies and incorporates it into a system that quickly and efficiently identifies Canadian suppliers for international and domestic markets.

Listing of firms in BOSS is free and voluntary.
